

## Formcode Digital Creative Careers

# Web Designer

Employment Type: Full

Minimum Experience: Experienced

Job Description:

Applicants must be local and willing to work at our Royal Oak MI office location.

## Web Designer

We build websites and web and mobile applications that are not only good-looking, but also sophisticated and supremely functional, and we're always looking for new solutions and technologies to help our clients achieve their goals faster.

We are looking for a passionate, driven web and graphics designer to add to our team. The applicant should be proficient in the entire web development stack and should have a good understanding of responsive design. Having a great understanding of front-end development is also encouraged. As a designer on our team, you will be required to conceptualize and design a website, or project, from inception to completion. You will work with the creative director to create wireframes, design concepts and finally design of the entire website for final approval. You will also be required to work on any additional

marketing components that are requested. This would include logo design, icon design, email marketing, etc. You will sometimes be required to design additional print material for clients; this could include brochures, corporate identity or advertisements. You should be open to working as part of a design and development team. We're looking for someone that is more than just a great designer, but someone who is extremely passionate about design and always striving to stay on top of new techniques and styles.

**We want someone who:**

- Is passionate about design!
- Stays up to date with current industry design standards, trends and forecasts.
- Is a terrific communicator.
- Has a painstaking attention to detail.
- Is always paying attention the latest and greatest technologies available on the web.
- Doesn't just want a place to work, but a environment to learn and be challenged

**Specific Requirements:**

- Responsive Web Design experience
- Illustrator
- Photoshop
- Front end development
- CSS

**Bonus Requirements:**

- Front end development with modern web standards using:
- CSS3
- HTML5
- JavaScript
- jQuery

If you can design/create engaging websites/web applications, communicate well with others and meet the criteria of what was just said above – then we're definitely interested in meeting you!

**Applicants must be local and willing to work at our Royal Oak MI office location.**

**How to apply; Send us:**

- |  |                                     |
|--|-------------------------------------|
| • <b>Address</b>                         | • <b>Website, Blog or Portfolio</b> |
| • <b>LinkedIn Profile</b>                | • <b>Desired Salary</b>             |
| • <b>Highest Education Obtained</b>      | • <b>Earliest Start Date</b>        |
| • <b>College/University</b>              | • <b>References</b>                 |
| • <b>Detail on what makes you unique</b> | • <b>Cover Letter</b>               |

**Send the details above and your Resumes to [Careers@formcode.com](mailto:Careers@formcode.com)**
